Close-Quarters Boat Control Course:

Defensive boat handling course focused on maneuvers and techniques.

This course is developed in a step-by-step, skill-based progression.

Docking, coming along-side, backing, or turning in narrow space can be done very competently by the boat operator who understands concepts and knowledge of your boat and how it reacts in varying weather and water conditions.

The boats used in this course are wheel-steered, stern-drive (I/O) or outboard powered, with either single or twin engines and ideally of center-console design. The boat will be 18 – 26 feet in length.

This course is a certified course through the **National Safe Boating Council** and is an 8 hour course.
