Open Water Boat Control Course:

Basic boat handling course focusing on how to effectively teach power boating.

This on-the-water course is developed in a step-by-step, skill-based progression. Coming up and down from planing mode is easy for the experienced boater, but can be scary for a new or novice boater.

Steering straight, turns and stopping will be performed both in displacement mode and planing mode. Crossing waves and wakes will be practiced along with how to approach and handle a person in the water.

This course is a certified course through the **National Safe Boating Council**

8 hour course.
